

Assignment 1: Getting Started with Excel

SUBMISSION GUIDELINES

- Save your Excel workbook as: Assignment1_YourName.xlsx
- Capture full-screen screenshots of each completed task (formulas, results, charts).
- Create one folder named Excel_YourName and put the workbook and all screenshots inside.
- Compress the folder into a .zip file (Excel_YourName.zip).
- Upload the .zip file on the submission portal.

Zip File Must Contain

- Completed Excel workbook (Assignment1_YourName.xlsx)
- Screenshots of navigation, editing, and Quick Access Toolbar customization

⚠ Screenshots are mandatory with every submission!

Do NOT upload separate files.

Do NOT submit without compressing into a .zip file.

Covers: Getting Started with Excel – Basic Navigation, Editing Sheets/Cells/Ranges/Columns/Rows, and Customizing the Quick Access Toolbar.

Objective: Get comfortable moving around Excel, editing worksheets, and setting up your workspace using the basics taught in the Getting Started section.

Resource: Use the provided Excel_Practice_Dataset.xlsx file (Products, Sales, and Employees sheets) as the base data. It is shared along with this assignment.

What You Need To Do

Task 1: Basic Navigation

1. Open the Employees sheet from the dataset.
2. Practise navigation: use the Name Box to jump to a specific cell, Ctrl+Arrow keys to move to the edge of the data, and Ctrl+Home to return to A1.
3. Use Go To (Ctrl+G) to jump to a specific cell reference.

Task 2: Editing Sheets, Cells, Rows & Columns

4. Rename the sheet tab from "Employees" to "Emp_Data".
5. Insert a new row at the top and add a title, and insert a new blank column between two existing columns.
6. Adjust column widths and row heights so all data is clearly visible (use AutoFit).
7. Add 2 new employee records at the bottom of the table by typing the data in.

Task 3: Data Entry & AutoFill

8. Create a new sheet named "Practice".
9. Use AutoFill to create a series: numbers 1–10, and the months Jan–Dec.
10. Enter a few rows of sample data and practise copy, cut, and paste.

Task 4: Customize the Quick Access Toolbar

11. Add at least 4 commands you use often to the Quick Access Toolbar (e.g., Save, Undo, Redo, Sort, Filter).
12. Take a screenshot showing your customized toolbar.
