

Assignment 3: Formatting, Pivot Tables & Data Management

SUBMISSION GUIDELINES

- Save your Excel workbook as: Assignment3_YourName.xlsx
- Capture full-screen screenshots of each completed task (formulas, results, charts).
- Create one folder named Excel_YourName and put the workbook and all screenshots inside.
- Compress the folder into a .zip file (Excel_YourName.zip).
- Upload the .zip file on the submission portal.

Zip File Must Contain

- Completed Excel workbook (Assignment3_YourName.xlsx)
- Screenshots of formatting, pivot tables, charts, and data validation

⚠ Screenshots are mandatory with every submission!

Do NOT upload separate files.

Do NOT submit without compressing into a .zip file.

Covers: Working with Tabs and Formatting (Home Tab, Number Formatting, Conditional Formatting), Data Analysis Basics (Pivot Tables, Charts), and Data Management (Sorting, Filtering, Data Validation).

Objective: Format data professionally and analyze it using pivot tables, charts, and data management tools.

Resource: Use the provided Excel_Practice_Dataset.xlsx file (Products, Sales, and Employees sheets) as the base data. It is shared along with this assignment.

What You Need To Do

Task 1: Formatting

1. Format the Sales table professionally: bold headers with a fill color, borders, and centered header text.
2. Apply currency number formatting (#,##0) to the Unit Price and Total Sales columns, and format Order Date as DD-MMM-YYYY.
3. Apply Conditional Formatting: highlight Total Sales above 100,000 in green, and add data bars to the Units column.

Task 2: Sort, Filter & Remove Duplicates

4. Sort the data by Total Sales (descending).
5. Filter to show only "South" region + "Furniture" category orders.
6. Check for and remove duplicate rows (note how many were removed).

Task 3: Pivot Tables

7. Create a Pivot Table: Total Sales by Region.
8. Create a Pivot Table: Total Sales by Category and Region (Region in columns).
9. Group Order Date by Month and show monthly Total Sales.

Task 4: Charts & Pivot Charts

10. Create a Column Chart of Total Sales by Region.
11. Create a Pie Chart of sales share by Category.
12. Create a Pivot Chart (Line) from your monthly sales pivot table.

Task 5: Data Validation

13. On a new sheet, create a data-entry area with a Region dropdown (North, South, East, West).
14. Add a rule so Units only accepts whole numbers greater than 0.
